Project Experience

Library Project - Group Leader • Oct 2018
Project Description:
- A public welfare project to create a small library in the community. The residents of the community can donate, borrow, exchange books, or take them for free.

Project Responsibilities:
- Organized volunteers for public welfare organizations; assembled and fixed small libraries made of wood, boards, glue guns, etc.
- Helped create free bookmarks.
- Collected feedback from the volunteers in the group; prepared report.
- Provided suggestion to the project organizers on the process management.

School Map Project – Volunteer • Jul 2014
Project Description:
- A school project to re-measure the road angle, elevation, length, building coordinates, height and other geographical data using Total Station and digitalize information drawing a new map using ArcGis software.

Project Responsibilities:
- Initiated using multiple validation and two-way data derivation that resulted in identifying incorrect baseline data.
- Helped the group create the new school map that was recognized to be the most accurate one among all other maps created by other groups.
